

Arium® Mini Promotion

Buy select Arium® Mini water systems and receive the first set of consumables for FREE

Arium® Mini Innovation for Efficient Research

Ultrapure water is the basis for successful analyses. Yet analytical methods are becoming more and more sensitive and thus more susceptible to interference. Consistently high water quality is decisive in ensuring the reproducibility of your results and in preventing time-consuming repeat analyses. You can always rely on the Arium® Mini series of laboratory water systems to consistently deliver the highest water quality.

Your Arium® Mini Benefits

Reliable: Delivers consistently high water quality for reliable and reproducible results; optionally available with UV lamp

Intuitive: Easy to operate using the touch-activated color display; with direct access to all important dispensing options

Innovative: Depending on the model type, with unique Bagtank technology to save you from the hassle of time-consuming tank cleaning

Compact: Space-saving footprint with a width of only 28 cm to easily fit in any lab environment

Free Consumables!

Arium® Mini Essential

Compact Laboratory Water System for 10 Liters per Day

The Arium® Mini Essential is a space-saving system which will be directly connected to the on-site DI water line of the laboratory for the production of ultrapure water.
